Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

Interview Guide

Analytical Thinking and Attention to Detail

Score: 69

Description:

This scale indicates both the capacity to think in a thoughtful, discerning way, to solve problems, utilize resources, analyze data, and apply attention to detail. Individuals who demonstrate high amounts of analytical thinking are able to recognize patterns rapidly, navigate through problems, and resolve difficult problems systematically. Individuals who demonstrate high attention to detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.

Interpretation:

Strong scores in this area correlate with above average performance for many jobs.

Usually able to think in a thoughtful, discerning way. Capable of solving difficult problems, planning many-featured tasks and projects, organizing multiple resources, and analyzing complex data with only occasional assistance. Usually able to quickly recall and use information when needed or appropriate. Additionally, can usually achieve a high degree of thoroughness and accuracy in work tasks.

Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?

1

Poor example. Does not show attention to detail or analytical ability.

2

Moderately relevant or impactful example.

3

4

Strongly relevant and clear example.

5

How do you handle a situation when you've messed up due to overlooking an important detail?

1

Is unable to handle the situation.

2

Demonstrates the ability to admit to their error and quickly fix the error, but didn't put preventative systems in place.

3

4

Demonstrates the ability to admit to their error, put preventative systems in place and quickly fix the error.

5

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail Interview Guide

Customer Service Mindset

Score: 83

Description:

Individuals who score highly on this scale understand their job is not just to solve customer problems, but to create a delightful experience that fosters loyalty and long-term rapport. They see every call as an opportunity to create a positive experience and to earn each customer's loyalty.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Holds a strong desire to understand customer needs and do whatever it takes to resolve customer issues. Likely to deliver exceptional customer service that delights the customer, greatly improves customer satisfaction and customer relationships, and strengthens the reputation of the organization.

As you know, it can be difficult to keep customers happy and accomplish your objectives at the same time. Can you think of a time when you had to encourage a customer to do something they didn't want to do and you still managed to keep them happy?

1

Did not demonstrate empathy or encourage positive action.

2

Encouraged action but did not empathize.

3

4

Demonstrated both empathy and assertiveness to work with customer.

5

What is your experience with multitasking? How were you able to handle doing multiple things at once?

1

Has no or minimal multitasking experience. Is unable to handle doing multiple things at once.

2

Has experience multitasking. Uses one effective skill to handle doing multiple things at once.

3

4

Has a lot of experience multitasking. Uses multiple effective skills to handle doing multiple things at once.

Detail Interview Guide

Drive

Score: 82

Description:

This scale reflects the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Highly motivated by challenging goals and tasks, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on understanding guidelines, following the rules and personal achievement.

Detail Interview Guide

Integrity

Score: 10

Description:

This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.

Interpretation:

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.

Interview Guide

What is more important: doing things right or meeting time commitments? Why?

1

Shows willingness to cut corners. Would require heavy quality assurance.

2

Some balance between quality and speed. Would require moderate quality assurance.

3

4

Clear emphasis on doing things correctly the first time.

5

What kind of circumstance(s) would justify breaking an organizational rule?

1

Answer shows that they are not concerned about ethics or organizational values/rules.

2

Answer explains only situational circumstances but the ethics are questionable and could pose a threat to the organization.

3

4

Answer explains only situational circumstances that fall under general ethical concerns and are of no threat to the organization. (OR) Explains that there are no circumstances.

5

Teamwork

Score: 62

Description:

This scale reflects the degree to which an individual works well with teams and maintains positive interpersonal relationships. High scores on this scale indicate a person will thrive in collaborative team settings and maintain high-quality relationships with coworkers. Low scores on this scale indicate a person will prefer working on individual projects and may struggle to maintain close working relationships with colleagues.

Interpretation:

The candidate's score in this area indicates neither a positive nor a negative impact on performance.

Occasionally cultivates relationships. Comfortable meeting new people and sensitive to how others feel. Interested in balancing relationship-building with work objectives and priorities.

Discuss a time when you were part of a team that accomplished something most people didn't think could be done. What was your role and what made the team so special?

1

No such experience. Example irrelevant.

2

Moderately relevant example and moderately relevant role.

3

4

Strong example and strong role.

5

Do you prefer working in teams or by yourself? Why?

1

They choose teams or individual and feel they would be incapable of working in the opposite environment.

2

They feel they would work well in either environment but are unable to back that up with rational reasons.

3

4

Response reflects rational reasons for why they prefer teams, individual, or both. They feel they would work well in either environment.

5

Emotional Intelligence Detail

This section contains a list of emotional intelligence characteristics that indicate how tuned in a candidate is to his or her own emotions, and those of others, as well as the candidate's ability to control his or her behavior in light of the emotions he or she is experiencing. These traits can often impact performance in groups or teams. Sample interview questions are provided to gather more information.

This section evaluates answers the candidate gave concerning his or her work-related history. Studies often show that a candidate's past behavior often indicates his or her future behavior. Potential caution areas (if any) are specified in each detail section.

Detail

Interview Guide

History Survey - Performance

Score: 85

Description:

Evaluates elements of the candidate's past work and education history to identify indications of high or low performance potential.

Interpretation:

The candidate's score indicates past behaviors that contribute to high job performance.

Exhibits past behaviors and achievements that are likely to enhance job performance.

The following potential performance risk areas were identified:

- Below average productivity history
 - Below average performance reviews
- Further probing is recommended for each of these items.

How does your work compare with your peers? Do you produce more or less? How do you know?

What kind of feedback have you received about your performance from your managers and your peers?

History Survey - Tenure

Score: 89

Description:

Evaluates a candidate's past employment history and related factors for indications of potentially low job tenure.

Interpretation:

The candidate's score indicates past behaviors that contribute to high job performance.

Exhibits behaviors likely to result in longer than average job tenure.

The following potential performance risk areas were identified:

- Frequent job changes
 - Potential long commute
- Further probing is recommended for each of these items.

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
