

Candidate: Betty Penske

Assessment: Assembler / Fabricator - Other (Short plus Video Interview)

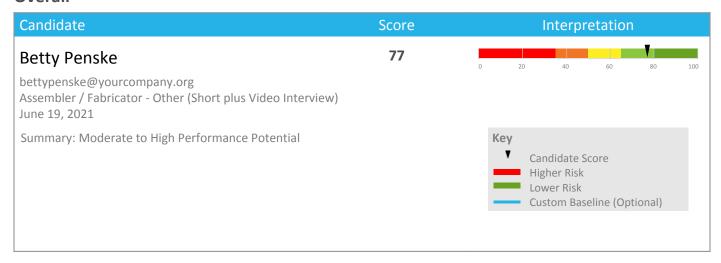

Completed: June 19, 2021 Prepared for: Susan Bookman

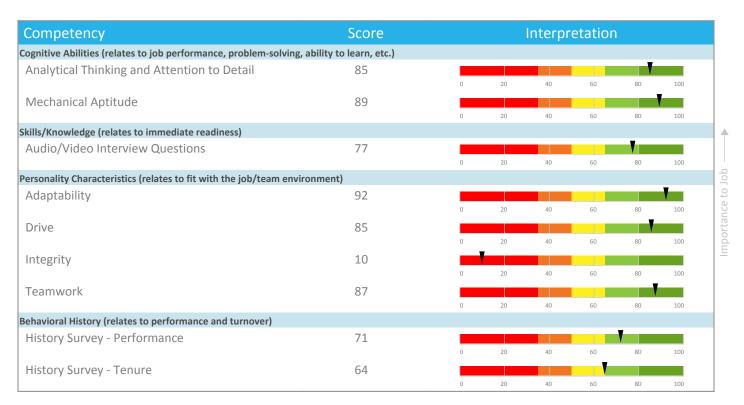

Test Results and Interview Guide

The Assembler / Fabricator - Other (Short plus Video Interview) assessment measures key factors related to high performance and tenure in this job. Attribute types measured include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Overall

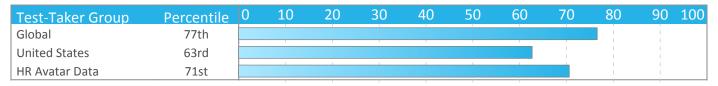

Competency Summary

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

Detail

Candidate: Betty Penske, bettypenske@yourcompany.org

Assessment: Assembler / Fabricator - Other (Short plus Video Interview)

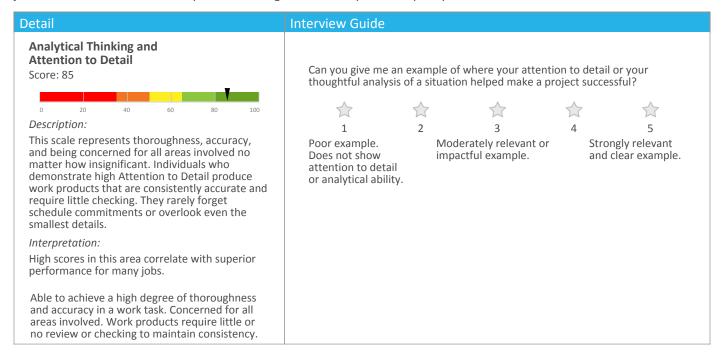

Authorized: June 19, 2021, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz

Started: June 19, 2021 at 10:43:03 AM EST Completed: June 19, 2021 at 10:43:03 AM EST

Overall Score: 77

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail	Interview Guide				
Audio/Video Interview Questions Score: 77 Description: A customized series of open-ended videoresponse questions were asked. Results include the video responses themselves for viewing, as well as transcripts, text analysis, and voice analysis. Text analysis includes vocabulary and grammar. Voice analysis includes perceived voice intonation and other speaking quality factors. Interpretation: The candidate's score in this area should contribute to enhanced overall job performance. Text and voice analysis indicates above average quality to open-ended responses. Please see below to view the converted text from the voice sample that was collected.	Tell me about how this kind of work. 1 Poorly structured answer. Not convincing.	2 Mc Acc	ground and experience 3 oderately persuasive. ceptable logic and ucture.	e have	e prepared you for 5 Convincing answer. Solid logic and structure.

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Detail Adaptability Score: 92 20 Description: This scale reflects how accepting a person is of requirements. Changing work requirements usually cause stress and put pressure on an

frequent or substantial changes in his or her job individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Thrives on change. Sees self as very flexible and easy-going. However, he or she may often be perceived as disinterested, unmotivated, or too easy-going in times of upheaval.

Interview Guide

Would you rather work in a job where the work is predictable or one where activities are constantly changing? Why?

Becomes paralyzed by change. Or disregards the

change and continues same path.

Resistant and fearful of change, or appears to live for change.

Comfortable with change, though feels some stress or anxiety. Usually able to stay focused.

Drive

Score: 85

Description:

This scale reflects the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Highly motivated by challenging goals and tasks, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on understanding guidelines, following the rules and personal achievement.

Tell me about a time when you went above and beyond the call of duty to achieve a difficult goal or challenge. What motivated you to put forth the extra effort?

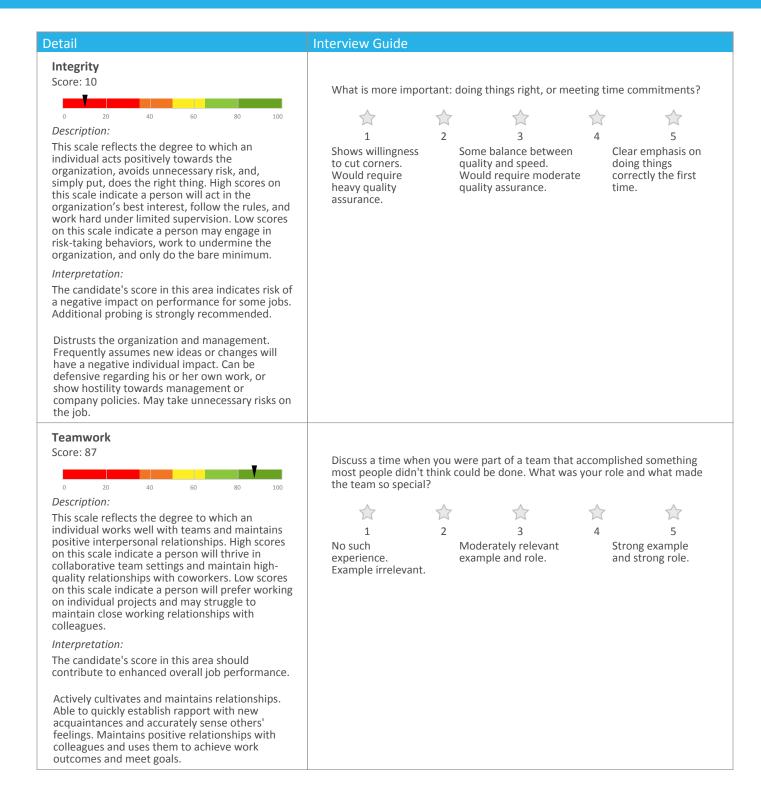

Poor or weak Moderate example. example. No real Some extra effort extra effort. evident.

Strong example. Clearly applied extra effort. Well organized in

approach.

Behavioral History Detail

This section evaluates answers the candidate gave concerning his or her work-related history. Studies often show that a candidate's past behavior often indicates his or her future behavior. Potential caution areas (if any) are specified in each detail section.

Detail

History Survey -Performance

Score: 71

Evaluates elements of the candidate's past work and education history to identify indications of high or low performance potential.

Interpretation:

The candidate's score indicates past behaviors that contribute to above average job performance.

Exhibits past behaviors and achievements that are likely to result in above average job performance.

The following potential performance risk areas were identified:

- Below average productivity history
- Below average performance reviews Further probing is recommended for each of these items.

Interview Guide

How does your work compare with your peers? Do you produce more or less? How do you know?

What kind of feedback have you received about your performance from your managers and your peers?

History Survey - Tenure

Score: 64

Description:

Evaluates a candidate's past employment history and related factors for indications of potentially low job tenure.

Interpretation:

The candidate's score indicates past behaviors that neither detract from nor enhance job performance.

Exhibits behaviors likely to result in average job

The following potential performance risk areas were identified:

- Frequent job changes
- Potential long commute

Further probing is recommended for each of these items.

Review your last few jobs with me, explaining why you left the old job and what attracted you to the new one.

What is the longest distance you have had to commute to work? What did you do during the commute? How long did you keep that job?

Audio/Video Responses

During the assessment, the candidate was asked to answer open-ended answer to one or more questions by either audio or video. If the candidate did not have the ability to upload audio or video they were asked to write their responses. The text of their responses as well as any included analysis of their speaking or text is provided below. Additionally, you can click on the links below (or cut and past into a web browser) to view or listen to their response directly.

Question	Response	
Introduce yourself. Start with your name and add in whatever you'd like to say.	hi my name is Ana Reyes and I'm currently working as an administrative occur in a company located here in Makati so I've been working in the company for a year-and-a-half doing pretty much filing documents and taking care of documentation for the whole company	
	View this video recording: https://www.hravatar.com/ta/avpb/0/9242	
Why are you leaving your current position?	so basically the reason why I want to leave my current position is because I would describe myself as a people person so in my current role I do not get to interact with a lot of people and so I find the job a little bit boring and unfulfilling	
	View this video recording: https://www.hravatar.com/ta/avpb/0/9243	
Why do you think you would succeed in the job you are applying for?	so I think I would succeed in the job that I'm applying for because I have a lot of energy and since I like working with a lot of people I think that our role in sales will also allow me to do what I really enjoy Winchester interact with all different kinds of people and also to learn in the process	
	View this video recording: https://www.hravatar.com/ta/avpb/0/9244	
Why do you want to do the job you are applying for?	so I mentioned earlier I am really interested in a sales job first of all because I like working with people and I think that I am convincing I also like the company that I'm applying for it has a lot of it snowing in the market and it looks like a really young and fun company	
	View this video recording: https://www.hravatar.com/ta/avpb/0/9245	

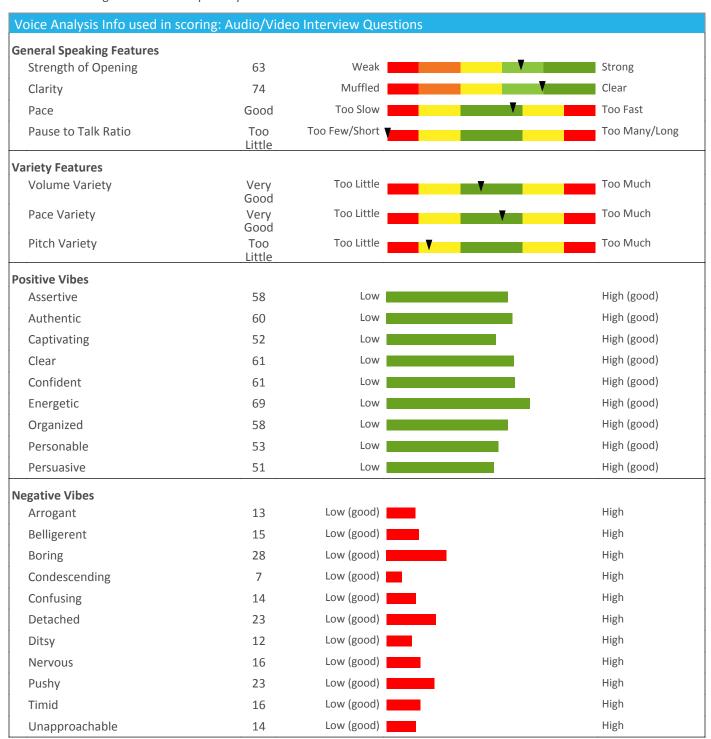

Question	Response		
Describe an achievement you are proud of. What did you have to accomplish and how did you do it?	so I think one of the biggest achievements that I have experience in my work so far is that I was able to help the accounting team a project of bears because I kept track of all the documents and I coordinated with different teams so that's all there are requirements were submitted so because of that are the accounting team was actually able to finish their project ahead of time		
	View this video recording: https://www.hravatar.com/ta/avpb/0/9246		
Where do you see yourself five years from now?	so five years from now I honestly see myself in a managerial position I'm also aspiring to find a job abroad also working in sales		
	View this video recording: https://www.hravatar.com/ta/avpb/0/9247		
Talk about anything you would like to add that might be helpful in our evaluation.	so I would also like to add that I have that when I was in college I was the president of an organization and one of the biggest projects which I handle it had to do with selling in order to raise funds so we were actually able to hit our Target really easily because of my efforts as well as a team separate

Voice Analysis Information

Spoken voice samples are processed through an artificial intelligence-based algorithm to determine how the speakers voice and speaking style is perceived by others. The following statistics and ratings were collected as part of this analysis and these were used in calculating the related competency scores.

Minimum Qualification Guidelines - from O*Net

The following are suggestions from O*Net, the United States government's occupational information network, regarding prerequisites for this job type.

Item	
Educational Achievement	High School

Item	
Job-Related Training	Less than 6 Months

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- For non-linear competencies, scores in the middle are more desirable. For these scales a score between 50 and 80 (dark green) represents scores that are within 1 standard deviation of the mean, scores between 80 and 95 and scores between 35 and 50 (yellow) represent scores that are 1 to 2 standard deviations above or below the mean, and scores above 95 or below 35 (red) represent scores that are more than 2 standard deviations above or below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit http://www.onetcenter.org.
- O*Net Standard Occupational Code (SOC) Used: 51-2092.00
- O*Net Version: 25.1

- UA: Mozilla/5.0 (Windows NT 6.3; Trident/7.0; Touch; rv:11.0) like Gecko

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Adaptability	92.2450	Z-Statistic	1.8163	5.0814
Analytical Thinking and Attention to Detail	85.3421	Z-Statistic	1.3561	15.4924
Drive	85.9290	Z-Statistic	1.3953	5.0165
History Survey - Performance	71.7147	Z-Statistic	0.4476	5.9372
History Survey - Tenure	64.7481	Z-Statistic	-0.0168	5.9372
Integrity	10.0000	Z-Statistic	-3.6667	5.4223
Mechanical Aptitude	89.0378	Z-Statistic	1.6025	14.8430
Teamwork	87.5526	Z-Statistic	1.5035	5.1626
Audio/Video Interview Questions	77.2493	Z-Statistic	0.8166	37.1075
Weighted Average of Competency Z-Scores:				0.8177
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				0.8177
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				77.2648
