Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

Detail	Interview Guide
<p>Adaptability Score: 64</p>  <p><i>Description:</i> This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.</p> <p><i>Interpretation:</i> The candidate's score in this area indicates neither a positive nor a negative impact on performance.</p> <p>Prefers a moderate amount of change in order to make progress. Feels too much change can be disruptive and undesirable. With coaching and reassurance is capable of remaining focused and positive throughout most change processes.</p>	<p>Would you rather work in a job where the work is predictable or one where activities are constantly changing? Why?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  1 Becomes paralyzed by change. Or disregards the change and continues same path. </div> <div style="text-align: center;">  2 Ambivalent to change. Has sound reasoning for falling in the middle. </div> <div style="text-align: center;">  3 </div> <div style="text-align: center;">  4 </div> <div style="text-align: center;">  5 Comfortable with change, though feels some stress or anxiety. Usually able to stay focused. </div> </div>
<p>Competitive Spirit Score: 72</p>  <p><i>Description:</i> This scale indicates the degree to which an individual is driven by a desire to win, to achieve objectives, and to outperform their peers. Competitiveness is the tendency to evaluate one's performance in comparison to others. It is characterized by a desire to do better than others, enjoying situations that can lead to a clear winner, and thriving in an environment where people are differentiated by accomplishments.</p> <p><i>Interpretation:</i> The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Likes to compete. Derives self-esteem from winning and will spend extra effort to succeed. Comfortable competing with peers.</p>	<p>How important is winning to you? How do you react when you don't win?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  1 Doesn't care much about winning. </div> <div style="text-align: center;">  2 </div> <div style="text-align: center;">  3 Not certain. Detail	Interview Guide
<p>Drive Score: 89</p>  <p><i>Description:</i> This scale reflects the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.</p> <p><i>Interpretation:</i> The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Highly motivated by challenging goals and tasks, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on understanding guidelines, following the rules and personal achievement.</p>	<p>Tell me about a time when you went above and beyond the call of duty to achieve a difficult goal or challenge. What motivated you to put forth the extra effort?</p> <p style="text-align: center;">★ ★ ★ ★ ★</p> <p style="text-align: center;">1 2 3 4 5</p> <p>Poor or weak example. No real extra effort. Moderate example. Some extra effort evident. Strong example. Clearly applied extra effort. Well organized in approach.</p>
<p>Integrity Score: 10</p>  <p><i>Description:</i> This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.</p> <p><i>Interpretation:</i> The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.</p> <p>Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.</p>	<p>What kind of circumstance(s) would justify breaking an organizational rule?</p> <p style="text-align: center;">★ ★ ★ ★ ★</p> <p style="text-align: center;">1 2 3 4 5</p> <p>Answer shows that they are not concerned about ethics or organizational values/rules. Answer explains only situational circumstances but the ethics are questionable and could pose a threat to the organization. Answer explains only situational circumstances that fall under general ethical concerns and are of no threat to the organization. (OR) Explains that there are no circumstances.</p>

Detail	Interview Guide
<p>Leader Mindset Score: 87</p> <p><i>Description:</i> Individuals scoring highly in Leadership Mindset want to be in charge. They confidently take responsibility for their team and expect to be held accountable for results. They understand the importance of trust in both directions and they delegate appropriately. They also know how to motivate individuals to contribute unselfishly to group goals.</p> <p><i>Interpretation:</i> The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Strongly prefers to be in charge and seeks out leadership opportunities. Feels that others naturally accept their leadership. Has a high degree of confidence in his or her own leadership ability.</p>	<p>Do you see yourself as a leader or a follower? Which to you prefer and why?</p> <p style="text-align: center;"> ★ 1 ★ 2 ★ 3 ★ 4 ★ 5 </p> <p> Prefers to be a follower. No clear preference. Has a solid argument for both. Prefers to be a leader whenever possible. </p>
<p>Teamwork Score: 82</p> <p><i>Description:</i> This scale reflects the degree to which an individual works well with teams and maintains positive interpersonal relationships. High scores on this scale indicate a person will thrive in collaborative team settings and maintain high-quality relationships with coworkers. Low scores on this scale indicate a person will prefer working on individual projects and may struggle to maintain close working relationships with colleagues.</p> <p><i>Interpretation:</i> The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Actively cultivates and maintains relationships. Able to quickly establish rapport with new acquaintances and accurately sense others' feelings. Maintains positive relationships with colleagues and uses them to achieve work outcomes and meet goals.</p>	<p>Discuss a time when you were part of a team that accomplished something most people didn't think could be done. What was your role and what made the team so special?</p> <p style="text-align: center;"> ★ 1 ★ 2 ★ 3 ★ 4 ★ 5 </p> <p> No such experience. Example irrelevant. Moderately relevant example and moderately relevant role. Strong example and strong role. </p>

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Adaptability	64.5187	Z-Statistic	-0.0321	2.6402
