Audio/Video Responses

During the assessment, the candidate was asked to answer open-ended answer to one or more questions by either audio or video. If the candidate did not have the ability to upload audio or video they were asked to write their responses. The text of their responses as well as any included analysis of their speaking or text is provided below. Additionally, you can click on the links below (or cut and past into a web browser) to view or listen to their response directly.

Question	Response
Introduce yourself. Start with your name and add in whatever you'd like to say.	hi my name is Ana Reyes and I'm currently working as an administrative occur in a company located here in Makati so I've been working in the company for a year-and-a-half doing pretty much filing documents and taking care of documentation for the whole company
Why are you leaving your current position?	so basically the reason why I want to leave my current position is because I would describe myself as a people person so in my current role I do not get to interact with a lot of people and so I find the job a little bit boring and unfulfilling
Why do you think you would succeed in the job you are applying for?	so I think I would succeed in the job that I'm applying for because I have a lot of energy and since I like working with a lot of people I think that our role in sales will also allow me to do what I really enjoy Winchester interact with all different kinds of people and also to learn in the process
Why do you want to do the job you are applying for?	so I mentioned earlier I am really interested in a sales job first of all because I like working with people and I think that I am convincing I also like the company that I'm applying for it has a lot of it snowing in the market and it looks like a really young and fun company
Describe an achievement you are proud of. What did you have to accomplish and how did you do it?	so I think one of the biggest achievements that I have experience in my work so far is that I was able to help the accounting team a project of bears because I kept track of all the documents and I coordinated with different teams so that's all there are requirements were submitted so because of that are the accounting team was actually able to finish their project ahead of time
Where do you see yourself five years from now?	so five years from now I honestly see myself in a managerial position I'm also aspiring to find a job abroad also working in sales
Talk about anything you would like to add that might be helpful in our evaluation.	so I would also like to add that I have that when I was in college I was the president of an organization and one of the biggest projects which I handle it had to do with selling in order to raise funds so we were actually able to hit our Target really easily because of my efforts as well as a team separate

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
