

Candidate: **Betty Penske**  
Assessment: Workplace Simulation - Business Sales  
Completed: December 1, 2020  
Prepared for: Susan Bookman

# Test Results and Interview Guide

The Workplace Simulation - Business Sales assessment measures key factors related to high performance and tenure in this job. Attribute types measured include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

## Overall

Candidate	Score	Interpretation
<b>Betty Penske</b> bettypenske@yourcompany.org Workplace Simulation - Business Sales December 1, 2020  Summary: Moderate to High Performance Potential	<b>76</b>	

**Key**

- ▼ Candidate Score
- Higher Risk
- Lower Risk
- Custom Baseline (Optional)

## Competency Summary

Competency	Score	Interpretation
<b>Cognitive Abilities (relates to job performance, problem-solving, ability to learn, etc.)</b>		
Analytical Thinking	64	
Attention to Detail	82	
Multitasking	77	
<b>Skills/Knowledge (relates to immediate readiness)</b>		
Sales Situation Analysis	81	

## Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Test-Taker Group	Percentile	0	10	20	30	40	50	60	70	80	90	100	
Global	76th												
United States	63rd												
HR Avatar Data	70th												

## Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O\*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

## Detail

Candidate: **Betty Penske**, [bettypenske@yourcompany.org](mailto:bettypenske@yourcompany.org)  
 Assessment: Workplace Simulation - Business Sales  
 Authorized: December 1, 2020, by Susan Bookman, HR Avatar Data Collection Account, [sue.bookman@richardson.biz](mailto:sue.bookman@richardson.biz)  
 Started: December 1, 2020 at 4:32:26 AM EST  
 Completed: December 1, 2020 at 4:32:26 AM EST  
 Overall Score: 76

## Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Detail	Interview Guide
<p><b>Analytical Thinking</b> Score: 64</p> <p><i>Description:</i> This scale indicates the capacity to think in a thoughtful, discerning way, to solve problems, utilize resources, and analyze data. Individuals who demonstrate high amounts of analytical thinking are able to recognize patterns rapidly, navigate through problems, and resolve difficult problems systematically.</p> <p><i>Interpretation:</i> Scores in this area correlate with average performance for many jobs.</p> <p>Sometimes able to think in a thoughtful, discerning way, though may require significant assistance in certain circumstances. Capable of solving moderate problems, planning moderately-featured tasks and projects, organizing resources, and analyzing moderately complex data. Can sometimes recall and use information when needed or appropriate, but may need prompting in some cases.</p>	<p>Tell me about a complex problem, situation, or planning task you had to deal with. What were the challenges, and how did you overcome them?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">★ 1 Example lacks complexity. Data seeking is limited, analysis may be lacking, actions unclear, not relevant, or ineffective.</div> <div style="text-align: center;">★ 2 Example is moderately complex. Shows some analytical thinking and problem solving. Actions have mixed or limited effectiveness.</div> <div style="text-align: center;">★ 3</div> <div style="text-align: center;">★ 4</div> <div style="text-align: center;">★ 5 Example shows complexity. Thorough investigation of all areas that might affect the decision. Actions are clear, relevant, and effective.</div> </div>

Detail	Interview Guide
<p><b>Attention to Detail</b> Score: 82</p>  <p><i>Description:</i> This scale represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.</p> <p><i>Interpretation:</i> High scores in this area correlate with superior performance for many jobs.</p> <p>Able to achieve a high degree of thoroughness and accuracy in a work task. Concerned for all areas involved. Work products require little or no review or checking to maintain consistency.</p>	<p>Give me an example of a time you discovered an error that had been overlooked by either you or someone you were working with. What did you do? What was the outcome?</p> <p style="text-align: center;">★      ★      ★      ★      ★ 1      2      3      4      5</p> <p>Unclear or careless example. Can't describe what was overlooked. No action.</p> <p>Moderately clear example. Some concern for details. Direct but passive action.</p> <p>Very detailed. Concern for all relevant components. Clear, proactive actions.</p>
<p><b>Multitasking</b> Score: 77</p>  <p><i>Description:</i> The ability to rapidly shift focus mentally from one task or issue to another while maintaining quality and attention to detail.</p> <p><i>Interpretation:</i> Strong scores in this area correlate with above average performance for many jobs.</p> <p>Exhibits a moderate capacity to change between areas of mental focus without sacrificing responsiveness, quality and attention to detail.</p>	<p>Tell me about a time when you had a large number of things going on at the same time, and you needed to quickly shift your attention between them.</p> <p style="text-align: center;">★      ★      ★      ★      ★ 1      2      3      4      5</p> <p>Unable to shift focus effectively. Became frustrated or had to slow down.</p> <p>Some ability to juggle between activities.</p> <p>Managed multiple independent activities effectively</p>

## Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail	Interview Guide
<p><b>Sales Situation Analysis</b> Score: 81</p>  <p><i>Description:</i> The ability to rapidly grasp the key issues and concerns of a prospective customer and to formulate the appropriate next steps.</p> <p><i>Interpretation:</i> Candidate should achieve superior job performance in this area with little or no training.</p> <p>Excellent ability to analyze sales situations and determine next steps.</p>	<p>Tell me about a time when you had to persuade somebody you didn't know to either purchase something or take some other action. How did you determine the best way to get what you wanted?</p> <p style="text-align: center;">★      ★      ★      ★      ★ 1      2      3      4      5</p> <p>Doesn't understand question. Unable to formulate a plan to influence.</p> <p>Some grasp of principles of understanding needs and mutual problem-solving.</p> <p>Asked questions and demonstrates clear grasp of principles of understanding needs and mutual problem-solving.</p>

## Identity Confirmation Photos

During the assessment the candidate was asked to photograph himself or herself for identity confirmation purposes. These photos and any analysis conducted are provided below.

### Photo Analysis Results

- Risk:	Medium risk of cheating based on image inconsistencies
- Valid Images Captured:	5
- Images used for Facial Comparison:	4
- Image Timeouts (no image captured):	1
- Unannounced Images Captured:	2
- Facial Comparison Average Match:	99%
- Matches:	6 strong vs 0 weak matches
- Detected Emotions:	Calm, Happy

## Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at [www.hravatar.com](http://www.hravatar.com).
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- For non-linear competencies, scores in the middle are more desirable. For these scales a score between 50 and 80 (dark green) represents scores that are within 1 standard deviation of the mean, scores between 80 and 95 and scores between 35 and 50 (yellow) represent scores that are 1 to 2 standard deviations above or below the mean, and scores above 95 or below 35 (red) represent scores that are more than 2 standard deviations above or below the mean.

## Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Analytical Thinking	64.8392	Z-Statistic	-0.0107	25.0000
Attention to Detail	82.5425	Z-Statistic	1.1695	25.0000
Multitasking	77.4728	Z-Statistic	0.8315	25.0000
Sales Situation Analysis	81.3911	Z-Statistic	1.0927	25.0000
Weighted Average of Competency Z-Scores:				0.7708
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				0.7708
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				76.5614
