# Test Results and Interview Guide

The Clerk - Bookkeeping, Accounting, and Auditing assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

## Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

| Test-Taker Group | Percentile |
|---|---|
| Global | 98th |
| United States | 81st |
| HR Avatar Data | 90th |

## Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

| Completed: | April 23, 2024, 12:11:04PM EST |
| Overall Score: | 98 |

## Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

| Detail | Interview Guide |
|---|---|
| **Analytical Thinking**<br>Score: 81<br> <br><br>*Description:*<br>This scale indicates the capacity to think in a thoughtful, discerning way, to solve problems, utilize resources, and analyze data. Individuals who demonstrate high amounts of analytical thinking are able to recognize patterns rapidly, navigate through problems, and resolve difficult problems systematically.<br>*Interpretation:*<br>High scores in this area correlate with superior performance for many jobs.<br><br>Able to think in a thoughtful, discerning way. Can often solve difficult problems, plan many-featured tasks and projects, organize multiple resources, and analyze complex data. Able to quickly recall and use information when needed or appropriate. | Tell me about a complex problem, situation, or planning task you had to deal with. What were the challenges, and how did you overcome them?<br><br>1 Example lacks complexity. Data seeking is limited, analysis may be lacking, actions unclear, not relevant, or ineffective.<br><br>2 3 Example is moderately complex. Shows some analytical thinking and problem solving. Actions have mixed or limited effectiveness.<br><br>4 5 Example shows complexity. Thorough investigation of all areas that might affect the decision. Actions are clear, relevant, and effective. |

| Detail | Interview Guide |
|---|---|
| **Adaptable**<br>Score: 78<br> <br><br>*Description:*<br>This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed.<br>*Interpretation:*<br>The candidate's score in this area should contribute to enhanced overall job performance.<br><br>Prefers a dynamic work environment. Able to remain focused and positive in times of significant workplace change. Fairly easy-going and relaxed. | Would you rather work in a job where the work is predictable or one where activities are constantly changing? Why?<br><br>1 Becomes paralyzed by change. Or disregards the change and continues same path.<br>2<br>3 Resistant and fearful of change, or appears to live for change.<br>4<br>5 Comfortable with change, though feels some stress or anxiety. Usually able to stay focused.<br><br>Describe a time at work or school when things were changing so fast it was hard to stay focused. How did you adjust to it?<br><br>1 Enjoyed the chaos of fast change. Became disinterested or negative and waited for things to calm down.<br>2<br>3 Did best but felt paralyzed and unable to work effectively.<br>4<br>5 Experienced higher anxiety but tried to deal with changes in a positive way. Stayed focused. |
| **Competitive**<br>Score: 93<br> <br><br>*Description:*<br>This scale indicates the degree to which an individual is driven by a desire to impress their leaders and exceed their peers. Being competitive can either be damaging or useful, depending on the job. Competitive people spend much of their time thinking about themselves and the impact decisions may have on them, and their actions are often guided by these thoughts, which can either provide the drive needed to achieve a goal, or can damage the ability of a team to work together. In general, high scorers perform well in sales and related jobs.<br>*Interpretation:*<br>The candidate's score in this area should contribute to enhanced overall job performance.<br><br>Highly motivated by challenging goals, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on personal achievement. | Would you describe yourself as competitive? Can you give me an example?<br><br>1 Non-competitive example, or doesn't show any consideration for others.<br>2<br>3 Example unclear. Doesn't address impact on others.<br>4<br>5 Competitive example that demonstrates drive and shows consideration of others.<br><br>Describe a time when you had to place accomplishing your objectives above supporting your team. Why do you think it was justified?<br><br>1 Justified for selfish or personal reasons. Shows little remorse for failing to support team.<br>2<br>3 Shows remorse and feels action was a mistake.<br>4<br>5 Clearly justified or was forced to do so by superiors. Strongly regrets and wishes could change. |

| Detail | Interview Guide |
|---|---|
| **Corporate Citizenship**<br>Score: 10<br> <br><br>*Description:*<br>This scale indicates the degree to which an individual's behavior embraces the spirit of an organization's mission, objectives, and strategy. High scorers project an attitude characterized by cooperation, trust, and openness. Low scorers often question the motives behind decisions. They may withhold information, display hostility, be defensive, or do just enough to get by.<br>*Interpretation:*<br>The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.<br>Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. | How do you feel about being part of an organization? Do you think most organizations have their employees' best interests at heart or do you have to always watch out for yourself?<br>1 Distrusts organizational motives. Feels the need to look out for self.<br>2<br>3 Supports organization but is wary of being taken advantage of.<br>4<br>5 Embraces organizational membership. Believes in organizational mission. |
| **Develops Relationships**<br>Score: 95<br> <br><br>*Description:*<br>This scale indicates a person's desire to cultivate relationships. High scorers seek opportunities to meet new people and get to know them well enough to form a lasting relationship. Low scorers tend to minimize interacting with people they don't know.<br>*Interpretation:*<br>The candidate's score in this area should contribute to enhanced overall job performance.<br>Actively cultivates and maintains relationships. Able to quickly establish rapport with new acquaintances and accurately sense others' feelings. Maintains a broad social network and uses it to achieve work objectives. | Describe your ideal job. Would it include working closely with others or would you prefer working mostly by yourself?<br>1 Prefers to work alone.<br>2<br>3 Cultivates relationships when opportunity arises or is necessary.<br>4<br>5 Enjoys cultivating relationships. Finds teamwork constructive.<br>---<br>Can you describe a time when you had to choose between getting the job done or preserving a relationship with a friend or co-worker?<br>1 Places relationship above the work objectives in all or most cases.<br>2<br>3 Sometimes struggles between work and relationships, but usually balances well.<br>4<br>5 Focuses on getting the job done but makes an effort not to hurt relationships. |

| Detail | Interview Guide |
|---|---|
| **Enjoys Problem-Solving**<br>Score: 75<br> <br><br>*Description:*<br>This scales represents a person's willingness to deal with complicated problems on a frequent or recurring basis. People with high scores prefer jobs that require mental challenge. Individuals with low scores may be intimidated when faced with complex or even simple issues on a regular basis. When jobs are routine or repetitive, people with low scores are usually a better fit.<br>*Interpretation:*<br>The candidate's score in this area should contribute to enhanced overall job performance.<br><br>Usually willing to analyze and formulate solutions to complex problems. Fairly confident in own ability to develop effective solutions. Sees frequent problem-solving as a core part of his or her job description, though may require prompting to take on a particularly difficult issue. | Describe some of the biggest on-the-job problems you have faced. How did you overcome them? How did you know they were solved?<br><br>1 — Problems poorly described and actions taken unclear.<br>2<br>3 — Moderately complex problems. Simple or obvious actions taken.<br>4<br>5 — Described one or more complex problems. Actions taken are clear and relevant. |
| **Exhibits a Positive Work Attitude**<br>Score: 78<br> <br><br>*Description:*<br>For some people, work is a second-place activity. That is, given a decision to take either personal time or go to work, low scorers will choose time off. Low job priority could indicate a 9 to 5 mentality.<br>*Interpretation:*<br>The candidate's score in this area should contribute to enhanced overall job performance.<br><br>Usually expects to receive both financial and personal rewards in exchange for solid and consistent effort on the job. Enjoys most work activities and is willing to put in extra effort when warranted or requested. | How do you feel having a regular job and going to work? Is it something you enjoy? Why or why not?<br><br>1 — Views work as a means of income only. Does not enjoy. Does not care about professional reputation.<br>2<br>3 — Likes work but doesn't truly enjoy it. Balances priority and energy with other obligations.<br>4<br>5 — Considers work a key priority in life. Enjoys working and always applies best energy. Takes pride in work reputation. |

## Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on ''Recalculate Percentiles'' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit http://www.onetcenter.org.
- O*Net Standard Occupational Code (SOC) Used: 43-3031.00
- O*Net Version: 26.3
- Sim ID: 187-27, Key: 0-0, Rpt: 13, Prd: 36, Created: 2024-04-23 17:11 UTC
- UA: Mozilla/5.0 (Windows NT 6.3; Trident/7.0; Touch; rv:11.0) like Gecko

## Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

| Competency | Score | How applied to overall | Score Value Used | Weight (%) |
|---|---|---|---|---|
| Adaptable | 78.9589 | Z-Statistic | 0.9306 | 3.0784 |
| Analytical Thinking | 81.8812 | Z-Statistic | 1.1254 | 0.2670 |
| Attention to Detail | 76.1598 | Z-Statistic | 0.7440 | 28.4968 |
| Bookkeeping Fundamentals | 82.3959 | Z-Statistic | 1.1597 | 15.4395 |
| Competitive | 93.6666 | Z-Statistic | 1.9111 | 3.0537 |
| Corporate Citizenship | 10.0000 | Z-Statistic | -3.6667 | 3.4513 |
| Data Entry | 79.0593 | Z-Statistic | 0.9373 | 0.3860 |
| Develops Relationships | 95.7495 | Z-Statistic | 2.0500 | 2.0956 |
| Enjoys Problem-Solving | 75.1688 | Z-Statistic | 0.6779 | 2.6887 |
| Exhibits a Positive Work Attitude | 78.0680 | Z-Statistic | 0.8712 | 3.4091 |
| History Survey - Performance | 75.5003 | Z-Statistic | 0.7000 | 7.7198 |
| History Survey - Tenure | 74.7528 | Z-Statistic | 0.6502 | 7.7198 |
