### Interview Guide

#### Memory / Attention to Detail / Logic & Reasoning

Score: 92

#### Description:

This scale reflects how successful a person is at making sense of a set of data or facts through logical reasoning. High scorers understand causes and consequences by interpreting a given situation and predicting its outcomes. They are able to remember details and take action accordingly. Low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied. This scale also represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.

#### Interpretation:

High scores in this area correlate with superior performance for many jobs.

Able to achieve a high degree of thoroughness and accuracy. Work requires little to no review or checking to maintain consistency. Can often solve difficult problems, plan many-featured tasks and projects, and organize multiple resources. Able to quickly recall and use information when needed or appropriate.

Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?

1

Poor example. Does not show attention to detail or analytical ability.

2

Moderately relevant or impactful example.

3

4

Strongly relevant and clear example.

5

How do you handle a situation when you've messed up due to overlooking an important detail?

1

Is unable to handle the situation.

2

Demonstrates the ability to admit to their error and quickly fix the error but didn't put preventative systems in place.

3

4

Demonstrates the ability to admit to their error, put preventative systems in place, and quickly fix the error.

5

## Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

2

Somewhat confident in own writing ability. Writes frequently.

3

4

Very confident in ability to write. Has received compliments on clarity of written correspondences.

5

## Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

### Detail

### Interview Guide

#### Adaptability

Score: 88

#### Description:

This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.

#### Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Thrives on change. Sees self as very flexible and easy-going. However, he or she may often be perceived as disinterested, unmotivated, or too easy-going in times of upheaval.

Describe a time where you had to adapt to some significant changes at work. How did you feel? How did you handle the change?

1

Feelings: Strong Dislike or Very Resistant. Weren't able to handle the change or needed significant help.

2

Feelings: Unfazed or Slightly Resistant. Handled the situation & change only impacted their work in a minor way.

3

4

Feelings: Excited or Comfortable. Handled the situation well and in a way that didn't interfere with their work.

5

What are some of the techniques you use to keep yourself from getting burnt out when faced with ever-changing conditions?

1

Candidate doesn't have an effective technique to keep them from getting burnt out.

2

Candidate is only able to explain one effective technique to keep them from getting burnt out.

3

4

Candidate explains multiple effective techniques allowing themselves to not get burnt out.

**Dealing with Uncertainty**

Score: 89

*Description:*

This scale reflects the degree to which an individual is able to cope with ambiguity. High scores on this scale indicate a person focuses on the present and is confident they will succeed without worrying about the future. Low scores on this scale indicate a person will worry about the future and possible negative things and events that are associated with that. They might even be incapable of overcoming a problem. They prefer predictable conditions.

*Interpretation:*

The candidate's score in this area should contribute to enhanced overall job performance.

Thrives on the unknown and able to cope with ambiguity. Focuses on the present and is confident in success. Does not worry about the future. May often be perceived as disinterested, unmotivated, or too easy-going in more predictable circumstances.

When uncertainty approaches in school or at work, do you focus on the present or the future? Explain.

1

The candidate shows they worry about the future and are unable to focus on their present work.

2

Their answer shows they worry about the future but are able to focus on the present and get their work done.

3

4

Regardless of the candidate's answer, they show that they are confident in succeeding without worrying about the future.

5

Worrying about future outcomes can prevent you from completing quality work. How do you ensure your work gets done in these uncertain times?

1

The candidate is unable to put their worry to the side and is incapable of completing their work.

2

The candidate is able to work through the worry, their work is either done on time or with quality, not both.

3

4

They show the ability to put their worry to the side and focus on the present to complete their work on time with quality.

Reaction: Overwhelmed. Struggles to come up with a clear way to overcome the obstacle and doesn't demonstrate hard work.

2

Reaction: Ready but not excited. Candidate shows they are able to overcome the obstacle but only by doing the bare minimum.

3

4

Reaction: Excited and ready. Candidate shows they are able to overcome the obstacle by putting in extra effort and being diligent.

5

**Detail**
**Interview Guide**
**Integrity**

Score: 10

**Description:**

This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.

**Interpretation:**

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

3

4

Explains only situational circumstances, or no circumstances. Judgement stems from ethical standards.

5

**Learning Agility**

Score: 87

**Description:**

This scale reflects the degree to which an individual is aware of how to learn. High scores on this scale indicate a person will thrive in ambiguous situations when it is not always clear what to do. This person enjoys applying newly learned concepts in different ways. They can adapt easily to new situations. Low scores on this scale indicate a person will prefer to work with supervision and clear guidance, may struggle to learn from and adapt to new experiences, relies on past solutions, and resists unfamiliar assignments.

**Interpretation:**

The candidate's score in this area should contribute to enhanced overall job performance.

Highly resourceful in finding and utilizing learning resources and opportunities. Thrives in an ambiguous learning environment. Is aware of how to learn without any guidance and can apply newly learned concepts in different ways. Able to adapt easily to new situations. May be perceived as disinterested or unmotivated when too much guidance is provided.

When faced with something new, do you prefer to work with supervision and clear guidance or do you prefer to take it upon yourself and apply learned concepts?

1

Prefers to work with supervision and clear guidance.

2

Prefers clear guidelines but has the ability to apply learned concepts on their own.

3

4

Prefers to take it upon themselves and apply learned concepts.

5

Imagine you were approached with a problem that was foreign to you, had no clear guidelines, and you were not able to seek guidance or assistance. How would you approach solving this problem on your own?

1

Candidate is unable to learn and adapt, resists the unfamiliar problem and seeks guidance.

2

Candidate shows the ability to learn independently and adapt, but not develop innovate solutions.

3

4

Candidate shows the ability to learn independently, develop innovate solutions, and adapt.

## Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at [www.hravatar.com](http://www.hravatar.com).
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

## Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
