

# Test Results and Interview Guide

Candidate: Assessment: Completed: Prepared for: **Richard Wantsajob** Internet Marketing Skills and Knowledge July 5, 2025 Sara Maple Example Company

## What's Included

- Overall Score
- Competency Summary Table
- Comparison Matrix
- Detailed Competency Results with Interview Guide

**Important Note:** The Internet Marketing Skills and Knowledge assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Proprietary and Confidential

## Overall

## **Competency Summary**

Competency	Score	Interpretation					
Skills/Knowledge (relates to immediate readiness)							
Internet Marketing Skills and Knowledge	76	0	20	40	60	80	100
Internet Marketing Skills and Knowledge (for Essay)	84	0	20	40	60	80	100

### Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

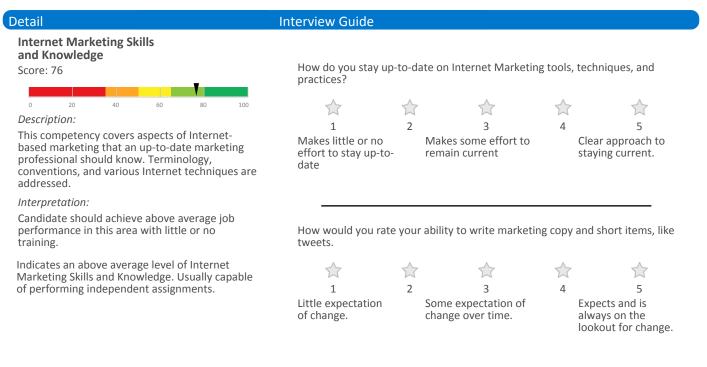

### Detail

Candidate:	Richard Wantsajob, rich.wantsajob@gmail.com
Assessment:	Internet Marketing Skills and Knowledge
Authorized:	July 5, 2025, by Sara Maple, Example Company, qamailsaram.mike@hravatar.com
Started:	July 5, 2025, 2:17:36PM EDT
Completed:	July 5, 2025, 2:17:36PM EDT
Overall Score:	76

#### **Knowledge and Skills Detail**

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

#### Internet Marketing Skills and Knowledge (for Essay) Score: 84

## 0 20 40 60 80 100

#### Description:

This competency covers aspects of Internetbased marketing that an up-to-date marketing professional should know. Terminology, conventions, and various Internet techniques are addressed.

#### Interpretation:

Superior writing skills can positively impact performance in many jobs.

Indicates a high level of Internet Marketing Skills and Knowledge. Capable of performing independent assignments and of mentoring others.

Raw computed score (AI): 80

Computed score confidence: 75

Approximate Word Count: 247

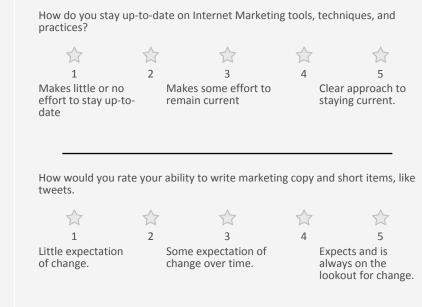

Please see below to view the essay submitted.

## Writing Sample(s)

During the assessment, the candidate was asked to write one or more passages. The text they wrote is included in the table below for review.

Writing Sample - Question	Response
Please write an essay describing the keys to creative writing.	This is a sample essay. In a real test situation, the candidate or test taker would write an essay as a part of their assessment, in response to the question associated with this entry. All reports will share their writing as received. In some cases, our artificial intelligence engine will process their response to create a numerical score. Our system also checks for plagiarism, both among previously submitted essays, and the broader Internet. Additionally, spelling, grammar, and style checks are performed.
	Essay typically are from 150 to 600 words. They can be written in response to an explicit question, or they can be free-form responses to general questions.

Interview Guide

## **Identity Confirmation Photos**

The following photos of the candidate and any identification were uploaded during the assessment session.

Photo Analysis Results					
- Risk:	Medium risk of cheating based on image inconsistencies				
- Percent match among processed faces	100%				
- Total images processed	17				
- Total images with valid faces	14 (82%)				
- Total pairs of faces compared	13				
- Pairs in which faces matched	13 (100%)

#### **Other Qualifications**

- Microsoft Office Specialist (MOS) Certification
- Certified Administrative Professional (CAP)
- International Association of Administrative Professionals (IAAP) Certification

## **Report Preparation Notes**

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

## **Score Calculation Detail**

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

<b>Competency</b> Internet Marketing Skills and Knowledge	<b>Score</b> 76.3503	How applied to overall Z-Statistic	Score Value Used 0.7567	Weight (%) 100.0000
Internet Marketing Skills and Knowledge (for Essay)	84.0090	Not used in Overall	0.0000	0.0000
Weighted Average of Cor	mpetency Z-Scores:			0.7567
Mean applied to Raw We	eighted Avg:			0.0000
Standard Deviation appli	ed to Raw Weighted Avg:			1.0000
Normalized Raw Score:				0.7567
Mean:				65.0000
Standard Deviation Used	:			15.0000
Final Overall Score:				76.3503
