

Candidate: **Betty Penske**  
Assessment: Basic Cognitive & Behavioral Assessment - Entry Level  
Completed: May 30, 2024  
Prepared for: Susan Bookman  
HR Avatar Data Collection Account

## Test Results and Interview Guide

The Basic Cognitive & Behavioral Assessment - Entry Level assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

## Overall

Candidate	Score	Interpretation
<b>Betty Penske</b> bettypenske@yourcompany.org Basic Cognitive & Behavioral Assessment - Entry Level May 30, 2024  Summary: High Performance Potential	<b>86</b>	

**Key**

- ▼ Candidate Score
- Higher Risk
- Lower Risk
- Custom Baseline (Optional)

## Competency Summary

Competency	Score	Interpretation
<b>Cognitive Abilities (relates to job performance, problem-solving, ability to learn, etc.)</b>		
Analytical Thinking and Attention to Detail	90	
<b>Scored Survey Questions (Custom Questions)</b>		
History Survey - Performance	66	
History Survey - Tenure	89	

## Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Test-Taker Group	Percentile	0	10	20	30	40	50	60	70	80	90	100	
Global	86th												
United States	71st												
HR Avatar Data	79th												

## Detail

Candidate: **Betty Penske**, bettypenske@yourcompany.org  
 Assessment: Basic Cognitive & Behavioral Assessment - Entry Level  
 Authorized: May 30, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz  
 Started: May 29, 2024, 8:33:37PM EST  
 Completed: May 29, 2024, 8:33:37PM EST  
 Overall Score: 86

## Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Detail	Interview Guide
<p><b>Analytical Thinking and Attention to Detail</b> Score: 90</p>  <p><i>Description:</i> This scale represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.</p> <p><i>Interpretation:</i> High scores in this area correlate with superior performance for many jobs.</p> <p>Able to think in a thoughtful, discerning way. Can often solve difficult problems, plan many-featured tasks and projects, organize multiple resources, and analyze complex data. Able to quickly recall and use information when needed or appropriate. Additionally, able to achieve a high degree of thoroughness and accuracy in a work task. Concerned for all areas involved. Work products require little or no review or checking to maintain consistency.</p>	<p>Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?</p> <p style="text-align: center;"> <span style="margin-right: 20px;">★</span> <span style="margin-right: 20px;">★</span> <span style="margin-right: 20px;">★</span> <span style="margin-right: 20px;">★</span> <span>★</span> </p> <p style="text-align: center;">1                      2                      3                      4                      5</p> <p>Poor example. Does not show attention to detail or analytical ability.                      Moderately relevant or impactful example.                      Strongly relevant and clear example.</p> <hr/> <p>How do you handle a situation when you've messed up due to overlooking an important detail?</p> <p style="text-align: center;"> <span style="margin-right: 20px;">★</span> <span style="margin-right: 20px;">★</span> <span style="margin-right: 20px;">★</span> <span style="margin-right: 20px;">★</span> <span>★</span> </p> <p style="text-align: center;">1                      2                      3                      4                      5</p> <p>Is unable to handle the situation.                      Demonstrates the ability to admit to their error and quickly fix the error, but didn't put preventative systems in place.                      Demonstrates the ability to admit to their error and quickly fix the error, but didn't put preventative systems in place.</p>

## Scored Survey Detail

This section provides additional detail on the candidate's scored survey responses. Potential caution areas (if any) are specified in each detail section.

Continued on next page.

Detail	Interview Guide
<p><b>History Survey - Performance</b> Score: 66</p> <p><i>Description:</i> Evaluates elements of the candidate's past work and education history to identify indications of high or low performance potential.</p>	<p>How does your work compare with your peers? Do you produce more or less? How do you know?</p> <p style="text-align: center;">               1                      2                      3                      4                      5           </p> <hr style="width: 40%; margin: 10px auto;"/> <p>What kind of feedback have you received about your performance from your managers and your peers?</p> <p style="text-align: center;">               1                      2                      3                      4                      5           </p>
<p><b>History Survey - Tenure</b> Score: 89</p> <p><i>Description:</i> Evaluates a candidate's past employment history and related factors for indications of potentially low job tenure.</p>	<p>Review your last few jobs with me, explaining why you left the old job and what attracted you to the new one.</p> <p style="text-align: center;">               1                      2                      3                      4                      5           </p> <hr style="width: 40%; margin: 10px auto;"/> <p>What is the longest distance you have had to commute to work? What did you do during the commute? How long did you keep that job?</p> <p style="text-align: center;">               1                      2                      3                      4                      5           </p>

## Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

### Photo Analysis Results

- Risk:	Medium risk of cheating based on image inconsistencies
- Percent match among processed faces	100%
- Total images processed	17
- Total images with valid faces	14 (82%)
- Total pairs of faces compared	13
- Pairs in which faces matched	13 (100%)

## Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at [www.hravatar.com](http://www.hravatar.com).
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- Sim ID: 14564-1, Key: 0-0, Rpt: 68, Prd: 5348, Created: 2024-05-30 01:33 UTC

## Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Analytical Thinking and Attention to Detail	90.5885	Z-Statistic	1.7059	70.9091
History Survey - Performance	66.2406	Z-Statistic	0.0827	14.5455
History Survey - Tenure	89.4600	Z-Statistic	1.6307	14.5455

Weighted Average of Competency Z-Scores:	1.4589
Mean applied to Raw Weighted Avg:	0.0000
Standard Deviation applied to Raw Weighted Avg:	1.0000
Normalized Raw Score:	1.4589
Mean:	65.0000
Standard Deviation Used:	15.0000
Final Overall Score:	86.8829
