Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Detail	Interview Guide
Memory / Attention to Detail / Logic & Reasoning Score: 66 *(scale bar: 0–100, marker near 66)* *Description:* This scale reflects how successful a person is at making sense of facts through logical reasoning. High scorers understand causes and consequences by interpreting a given situation and predicting its outcomes. They are able to remember details and take action accordingly. Low scorers may burn out or become paralyzed. In more stable circumstances, high scorers may become bored, while low scorers would remain satisfied. This scale also represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work that is consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details. *Interpretation:* Strong scores in this area correlate with above average performance for many jobs. Above-average scores in memory, attention to detail and logic indicate the candidate has the ability to learn quickly, recall information promptly, solve problems, and adapt to changing conditions. This usually means the candidate is likely to respond appropriately to challenging situations with little or no supervision.	Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful? ☆ 1 — Poor example. Does not show attention to detail or analytical ability. ☆ 2 ☆ 3 — Moderately relevant or impactful example. ☆ 4 ☆ 5 — Strongly relevant and clear example. --- How do you handle a situation when you've messed up due to overlooking an important detail? ☆ 1 — Is unable to handle the situation. ☆ 2 ☆ 3 — Demonstrates the ability to admit to their error and quickly fix the error but didn't put preventative systems in place. ☆ 4 ☆ 5 — Demonstrates the ability to admit to their error, put preventative systems in place, and quickly fix the error.

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

How do you feel when things change at work? How do you cope?

★ 1 ★ 2 ★ 3 ★ 4 ★ 5

1 Candidate gets frustrated and doesn't have an effective way to cope.

3 Candidate recognizes that they struggle and has one quality way to cope.

5 Candidate thrives when things change and has multiple ways to cope.

Conscientiousness

Score: 76

0 20 40 60 80 100

Description:

This scale reflects the amount of pride a person takes in producing quality work products. Additionally, it demonstrates the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Takes pride in performing quality work. Motivated by challenging goals and tasks, financial reward, and/or recognition, and willing to work hard to succeed. Focused on understanding and following guidelines, personal achievement, and meeting or exceeding quality and production standards.

Describe a time when you had some extra time available at work. How did you use this extra time?

★ 1 ★ 2 ★ 3 ★ 4 ★ 5

1 Did not use their time in a beneficial way, or in a way that added value to the organization.

3 Used their time in a work related way, but those efforts didn't demonstrate hard work or added value (easy).

5 Used time in a beneficial way and added value to the organization. Showed ability to work hard and willingness to put in extra effort.

How do you react when you are faced with obstacles while trying to achieve a goal? How do you overcome them?

★ 1 ★ 2 ★ 3 ★ 4 ★ 5

1 Reaction: Overwhelmed Struggles to come up with a clear way to overcome the obstacle and doesn't demonstrate hard work.

3 Reaction: ready but not excitedCandidate shows they are able to overcome the obstacle but only by doing the bare minimum.

Detail	Interview Guide

Reliability

Score: 66

Description:

This scale reflects the degree to which an individual is able to be trusted and maintain consistent quality performance. High scores on this scale indicate a person who can be trusted to do what they say, always follows through, and never breaks their promises. Low scores on this scale indicate a person who would likely brush off timelines and responsibilities, and is known for being inconsistent.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Responses indicate the candidate is trustworthy and likely to show consistent performance. Can be expected to meet commitments and to earn the respect of peers in doing so. Able to form mutually supportive work relationships while reducing potential for workplace conflict.

Service Orientation

Score: 93

Description:

This scale reflects the degree to which an individual recognizes and meets customers' needs. High scores on this scale indicate a person who makes themselves available for others and cares about them. They show a level of understanding, dedication, and the ability to be proactive. Low scores on this scale indicate a person who has difficulty recognizing the needs of others, often preoccupied with their personal needs, and may find some customers to be unreasonable.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Holds a strong desire to understand customer needs and do whatever it takes to resolve customer issues. Likely to deliver exceptional customer service that delights the customer, greatly improves customer satisfaction and customer relationships, and strengthens the reputation of the organization. Demonstrates a strong level of understanding, dedication, and the ability to be proactive.

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on ''Recalculate Percentiles'' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit http://www.onetcenter.org.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
