

Candidate: **Betty Penske** Assessment: Data Entry Keyers Completed: May 14, 2024 Prepared for: Susan Bookman HR Avatar Data Collection Account

Test Results and Interview Guide

The Data Entry Keyers assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

| Test-Taker Group | Percentile | 0 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 |

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

| Attention to Detail Score: 95 Description: This scale represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details. | of a time you discovered an erry you or someone you were wor tcome? 2 3 Moderately clear example. Some concern for details. Direct but passive action. | |
|--|---|--|
| Interpretation: High scores in this area correlate with superior performance for many jobs. Able to achieve a high degree of thoroughness and accuracy in a work task. Concerned for all areas involved. Work products require little or no review or checking to maintain consistency. | situation when you've messed dow do you feel and what do y 2 3 Demonstrates the ability to admit to their error, and quickly fix the error, but didn't put preventative systems in place. | |

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

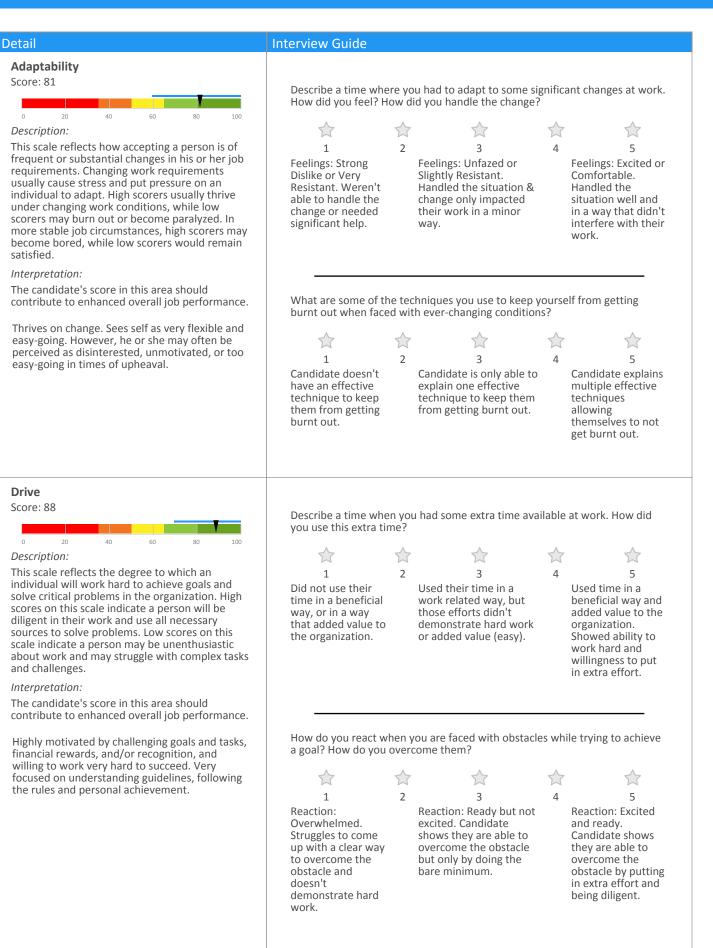

Continued on next page.

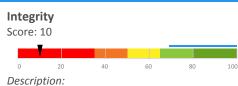

| Detail | Interview Guide |
|--|---|
| Data Entry Score: 98 Description: The ability to accurately enter information into computer-based forms. Interpretation: Candidate should achieve superior job performance in this area with little or no training. Consistently enters data into computer forms | How do you typically ensure that you enter data correctly into web or computer-based forms? A A A S How do you typically ensure that you enter data correctly into web or computer-based forms? How do you typically ensure that you enter data correctly into web or computer-based forms? How do you typically ensure that you enter data correctly into web or computer-based forms? |
| reliably and accurately. Rarely makes mistakes or errors. | Describe how you ensure accuracy in your work, particularly when entering information into a computer. 1 2 3 Doesn't provide any adequate strategies for ensuring accuracy in their work. |
| Typing Speed & Accuracy Score: 68 Description: Evaluates a candidate's ability to enter data into a computer screen using a keyboard at both an acceptable rate of speed and degree of accuracy. Interpretation: Candidate should achieve above average job performance in this area with little or no training. Above average. Types information quickly and accurately compared to peers. Submitted work typically requires only light review prior to sending to end users or customers. • Speed: 60 Words/Min • Accuracy-Adjusted Speed: 50 Words/Min | Can you tell me about a time when your ability to type quickly and accurately helped you achieve a goal or objective? 1 2 3 4 5 Typing or data entry is not relevant to example. Can you tell me about a time when your ability to type quickly and accurately 2 3 4 5 Example is somewhat related to typing or data accuracy. Can you tell me about a time when your ability to type quickly and accurately 4 5 Example demonstrates fast and accurate data entry or typing under pressure. |

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.

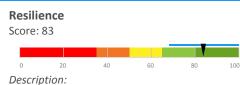

Interpretation:

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.

Interview Guide

What circumstance(s) might cause you to withhold information from your supervisor? How would you judge whether doing so would be justified? $\overrightarrow{}$ $\widehat{\mathbf{v}}$ $\widehat{\mathbf{A}}$ $\widehat{\mathbf{v}}$ Ŵ 1 2 3 5 4 Shows that they Explains only situational Explains only are not concerned circumstances. situational about ethics or Judgement does not circumstances, or organizational stem from an ethical no circumstances. values/rules. standpoint. Judgement stems from ethical standards. Do you think it's ever okay to withhold information from your supervisor? How would you judge whether doing so is okay or not? T Ŷ T Ŷ Ŵ 1 2 3 4 5 Answer shows that Explains only situational Explains only they are not circumstances. situational concerned about Judgement does not circumstances, or ethics or stem from an ethical no circumstances. standpoint. organizational Judgement stems values/rules. from ethical standards.

This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.

Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.

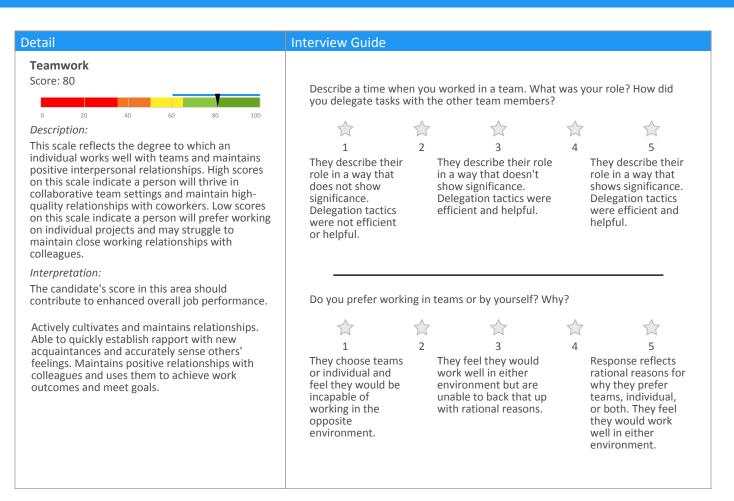

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions, having control over the events, being proactive, remaining hopeful, and learning from the experience. Candidate can always be expected to push forward to achieve their goals, even when obstacles come their way.

Interview Guide

Describe a time when something at work/school didn't go as planned. How did you feel? How did it impact your work moving forward? $\widehat{\mathbf{v}}$ $\widehat{\mathbf{v}}$ $\widehat{\mathbf{A}}$ Ŵ T 2 1 3 4 5 Feelings had a Feelings are true to the Feelings are true to negative outlook. situation. History Survey - Tenure Score: 68

Description:

Evaluates a candidate's past employment history and related factors for indications of potentially low job tenure.

Interpretation:

The candidate's score indicates past behaviors that contribute to above average job performance.

Exhibits behaviors likely to result in slightly longer than average job tenure.

The following potential performance risk areas were identified:

• Frequent job changes

• Potential long commute Further probing is recommended for each of these items.

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the
 assessment is scored. As additional instances are completed, the comparative data may change. You can always update a
 report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at
 www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S.
 Federal Government U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit http://www.onetcenter.org.
- O*Net Standard Occupational Code (SOC) Used: 43-9021.00
- O*Net Version: 26.3

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

| Competency | Score | How applied to overall | Score Value Used | Weight (%) |
|---------------------------------|---------|------------------------|------------------|------------|
| Adaptability | 81.1304 | Z-Statistic | 1.0754 | 4.9336 |
| Attention to Detail | 95.2900 | Z-Statistic | 2.0193 | 37.3698 |
| Data Entry | 98.1499 | Z-Statistic | 2.2100 | 12.3921 |
| Drive | 88.8056 | Z-Statistic | 1.5870 | 5.1504 |
| History Survey - Performance | 90.9671 | Z-Statistic | 1.7311 | 6.1960 |
| History Survey - Tenure | 68.7285 | Z-Statistic | 0.2486 | 6.1960 |
| Integrity | 10.0000 | Z-Statistic | -3.6667 | 5.3402 |
| Resilience | 83.5714 | Z-Statistic | 1.2381 | 5.1504 |
| Teamwork | 80.8136 | Z-Statistic | 1.0542 | 4.8794 |
| Typing Speed & Accuracy | 68.7218 | Z-Statistic | 0.2481 | 12.3921 |
