

Candidate: **Betty Penske**
Assessment: Specialist - Computer Network Support
Completed: May 13, 2024
Prepared for: Susan Bookman
HR Avatar Data Collection Account

Test Results and Interview Guide

The Specialist - Computer Network Support assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Detail

Candidate: Betty Penske, bettypenske@yourcompany.org
Assessment: Specialist - Computer Network Support
Authorized: May 13, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz
Started: May 13, 2024, 4:49:23AM EST
Completed: May 13, 2024, 4:49:23AM EST
Overall Score: 69

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

| Detail | Interview Guide |
|---|---|
| <p>Analytical Thinking and Attention to Detail Score: 68</p>  <p><i>Description:</i> This scale indicates both the capacity to think in a thoughtful, discerning way, to solve problems, utilize resources, analyze data, and apply attention to detail. Individuals who demonstrate high amounts of analytical thinking are able to recognize patterns rapidly, navigate through problems, and resolve difficult problems systematically. Individuals who demonstrate high attention to detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.</p> <p><i>Interpretation:</i> Strong scores in this area correlate with above average performance for many jobs.</p> <p>Usually able to think in a thoughtful, discerning way. Capable of solving difficult problems, planning many-featured tasks and projects, organizing multiple resources, and analyzing complex data with only occasional assistance. Usually able to quickly recall and use information when needed or appropriate. Additionally, can usually achieve a high degree of thoroughness and accuracy in work tasks.</p> | <p>Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?</p> <div><div>★ 1</div><div>★ 2</div><div>★ 3</div><div>★ 4</div><div>★ 5</div></div> <p>Poor example. Does not show attention to detail or analytical ability.</p> <p>Moderately relevant or impactful example.</p> <p>Strongly relevant and clear example.</p> <hr/> <p>How do you handle a situation when you've messed up due to overlooking an important detail?</p> <div><div>★ 1</div><div>★ 2</div><div>★ 3</div><div>★ 4</div><div>★ 5</div></div> <p>Is unable to handle the situation.</p> <p>Demonstrates the ability to admit to their error and quickly fix the error, but didn't put preventative systems in place.</p> <p>Demonstrates the ability to admit to their error, put preventative systems in place and quickly fix the error.</p> |

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Detail

Interview Guide

Integrity

Score: 10

Description:

This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.

Interpretation:

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.

What circumstance(s) might cause you to withhold information from your supervisor? How would you judge whether doing so would be justified?

1

Shows that they are not concerned about ethics or organizational values/rules.

2

Explains only situational circumstances. Judgement does not stem from an ethical standpoint.

3

4

Explains only situational circumstances, or no circumstances. Judgement stems from ethical standards.

5

Do you think it's ever okay to withhold information from your supervisor? How would you judge whether doing so is okay or not?

1

Answer shows that they are not concerned about ethics or organizational values/rules.

2

Explains only situational circumstances. Judgement does not stem from an ethical standpoint.

3

4

Explains only situational circumstances, or no circumstances. Judgement stems from ethical standards.

|---|--|
| <p>Resilience</p> <p>Score: 68</p>  <p><i>Description:</i></p> <p>This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.</p> <p>Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.</p> <p><i>Interpretation:</i></p> <p>The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions and the ability to take control of events. Candidate can likely push forward to achieve their goals, even when obstacles come their way.</p> | <p>Describe a time when something at work/school didn't go as planned. How did you feel? How did it impact your work moving forward?</p> <div> <div>★</div> <div>1</div> <p>Feelings had a negative outlook. Event impacted their work in a negative way, they weren't able to learn from it or persevere.</p> </div> <div> <div>★</div> <div>2</div> <p>Feelings are true to the situation. Emotional Intelligence Detail

This section contains a list of emotional intelligence characteristics that indicate how tuned in a candidate is to his or her own emotions, and those of others, as well as the candidate's ability to control his or her behavior in light of the emotions he or she is experiencing. These traits can often impact performance in groups or teams. Sample interview questions are provided to gather more information.

Detail

Empathy and Emotional Self-Control

Score: 74

| Score Range | Color |
|-------------|------------|
| 0 - 20 | Red |
| 20 - 40 | Orange |
| 40 - 60 | Yellow |
| 60 - 80 | Green |
| 80 - 100 | Dark Green |

Description:

This scale reflects both the ability to sense and understand other people's feelings, feel sympathy for others, and see things from other people's point of view, and the ability to manage the desire to satisfy urges or impulses, showing restraint and managing behaviors to ensure appropriate and effective interactions with others.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Demonstrates strengths in sensing the emotional needs of others, sympathizing with other people's problems, and seeing things from other people's point of view. Likely to be effective at demonstrating to customers or coworkers that they understand and care about them, resulting in improved customer loyalty, stronger work relationships, and reduced levels of conflict in the workplace.

Interview Guide

How well can you sense how others around you are feeling? How do you use this information when interacting with them?

1

Demonstrates that they are unable to sense how others around them are feeling.

2

Provides examples on how they are able to sense other's feelings. They don't use this to show understanding and care.

3

Provides examples on how they are able to sense others' feelings. They use this to show they understand and care about them.

4

5

What do you typically do when you are working closely with someone who is very upset?

1

They have an inappropriate response and don't demonstrate understanding or care.

2

They (1) have an appropriate response and (2) demonstrate understanding but unable to show the customer that they care.

3

They (1) have an appropriate response (2) demonstrate understanding and (3) show the customer that they care.

4

5

Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

| Photo Analysis Results | |
|---------------------------------------|--|
| - Risk: | Medium risk of cheating based on image inconsistencies |
| - Percent match among processed faces | 100% |
| - Total images processed | 17 |
| - Total images with valid faces | 14 (82%) |
| - Total pairs of faces compared | 13 |
| - Pairs in which faces matched | 13 (100%) |

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.
- O*Net Standard Occupational Code (SOC) Used: 15-1231.00
- O*Net Version: 26.3
- Sim ID: 15505-1, Key: 0-0, Rpt: 13, Prd: 6356, Created: 2024-05-13 09:49 UTC
- UA: Mozilla/5.0 (Windows NT 6.3; Trident/7.0; Touch; rv:11.0) like Gecko

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

| Competency | Score | How applied to overall | Score Value Used | Weight (%) |
|---|---------|------------------------|------------------|------------|
| Adaptability | 89.9795 | Z-Statistic | 1.6653 | 5.9091 |
| Analytical Thinking and Attention to Detail | 68.3168 | Z-Statistic | 0.2211 | 44.7579 |
| Drive | 96.2933 | Z-Statistic | 2.0862 | 6.1590 |
| Empathy and Emotional Self-Control | 74.1684 | Z-Statistic | 0.6112 | 8.1610 |
| History Survey - Performance | 70.0563 | Z-Statistic | 0.3371 | 8.1610 |
| History Survey - Tenure | 78.7503 | Z-Statistic | 0.9167 | 8.1610 |
| Integrity | 10.0000 | Z-Statistic | -3.6667 | 6.2125 |
| Resilience | 68.1915 | Z-Statistic | 0.2128 | 6.1590 |
| Teamwork | 69.0701 | Z-Statistic | 0.2713 | 6.3197 |
| Weighted Average of Competency Z-Scores: | | | | 0.2805 |
| Mean applied to Raw Weighted Avg: | | | | 0.0000 |
