

Test Results and Interview Guide

Candidate: **Richard Wantsajob**
Assessment: Spanish Grammar
Completed: May 2, 2025
Prepared for: Sara Maple
Example Company

What's Included

- Overall Score
- Competency Summary Table
- Comparison Matrix
- Detailed Competency Results with Interview Guide

Important Note: The Spanish Grammar assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Overall

Candidate	Score	Interpretation
Richard Wantsajob rich.wantsajob@gmail.com Spanish Grammar May 2, 2025	74	

The candidate's scores indicate moderate to high performance potential in most editing or writing related jobs. We recommend that this score be used in conjunction with a comprehensive process for evaluating potential performance, including the specific knowledge, skills, and abilities required for a particular job.

Key

- Candidate Score
- Higher Risk
- Lower Risk

Competency Summary

Competency	Score	Interpretation
Skills/Knowledge (relates to immediate readiness)		
Grammar	76	
Spelling	71	

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Detail

Candidate: **Richard Wantsajob**, rich.wantsajob@gmail.com
 Assessment: Spanish Grammar
 Authorized: May 2, 2025, by Sara Maple, Example Company, qamailsaram.mike@hravatar.com
 Started: May 2, 2025, 1:35:54 AM EDT
 Completed: May 2, 2025, 1:35:54 AM EDT
 Overall Score: 74

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail
Interview Guide

Grammar

Score: 76

Description:

Evaluates a candidate's knowledge of grammar rules, including sentence structure, subject-verb agreement, punctuation, conjunctions, contractions, and common writing errors.

Interpretation:

Candidate should achieve above average job performance in this area with little or no training.

Above average. Is familiar with grammar rules and can identify errors quickly and accurately compared to peers. Submitted work typically requires only light review prior to sending to end users or customers.

Tell me about a time when you had to write something persuasive. What did you write, and what steps did you take to make sure it was effective?

★	★	★	★	★
1	2	3	4	5
Unable to provide example of persuasive writing.	Example acknowledges importance of review and following grammar and structure rules.	Example demonstrates success writing persuasive material and incorporates steps to ensure correct grammar and formatting.		

Spelling

Score: 71

Description:

Evaluates a candidate's ability to spell words. Candidates hear a word and must type in the word using a computer screen and keyboard at both an acceptable rate of speed and degree of accuracy.

Interpretation:

Candidate should achieve above average job performance in this area with little or no training.

Above average. Can spell words accurately compared to peers. Submitted work typically requires only light review prior to sending to end users or customers.

Tell me about a time when you had to transcribe information. What did you transcribe, and what was the outcome?

★	★	★	★	★
1	2	3	4	5
Unable to provide example.	Example demonstrates experience listening and accurately conveying information.	Example demonstrates experience listening and accurately conveying information under pressure.		

Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

Photo Analysis Results

- Risk:	Medium risk of cheating based on image inconsistencies
- Percent match among processed faces	100%
- Total images processed	17
- Total images with valid faces	14 (82%)
- Total pairs of faces compared	13
- Pairs in which faces matched	13 (100%)

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Grammar	76.4778	Z-Statistic	0.7652	50.0000
Spelling	71.7964	Z-Statistic	0.4531	50.0000
Weighted Average of Competency Z-Scores:				0.6091
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				0.6091
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				74.1371
