Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Detail	Interview Guide
<p>Adaptability Score: 94</p> <p><i>Description:</i> This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.</p> <p><i>Interpretation:</i> The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Thrives on change. Sees self as very flexible and easy-going. However, he or she may often be perceived as disinterested, unmotivated, or too easy-going in times of upheaval.</p>	<p>Even in a fast-changing environment there can be periods of relative calm and stability. Detail	Interview Guide
<p>Managing Resources & Balancing Priorities Score: 63</p>  <p><i>Description:</i> Evaluates a candidate's ability to not only manage resources provided but to balance priorities within a team. High scores on this scale indicate that the individual will likely fulfill goals in a timely manner, have the ability to say "no" when it is appropriate, and be able to determine which demands are important. Low scores on this scale indicate that the individual will likely feel overwhelmed, over-commit, and not give priority to demands that need the most attention.</p> <p><i>Interpretation:</i> The candidate's score in this area indicates neither a positive nor a negative impact on performance.</p> <p>Average scores in the scale indicate that the candidate is likely to have the ability to fulfill goals in a somewhat timely manor and potentially say "no" when it is appropriate. To ensure satisfactory results, the candidate may need additional supervision in giving priority to demands that need the most attention so that they do not feel overwhelmed or over-commit.</p>	<p>Why is it important to manage resources and balance priorities within a team?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">★ 1 Is unable to explain the importance of managing resources and balancing priorities within a team.</div> <div style="text-align: center;">★ 2 Can only explain the importance of one: (1) fulfilling goals in a timely manner or (2) not over-committing</div> <div style="text-align: center;">★ 3 Explains the importance of (1) fulfilling goals in a timely manner AND (2) not over-committing</div> </div> <hr/> <p>How do you handle an overwhelming situation due to over-committing yourself or your team?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">★ 1 Explains they do not work well with competitive people and it leaves them unmotivated.</div> <div style="text-align: center;">★ 2 Demonstrates the ability to admit to and quickly fix their error but didn't put preventative systems in place.</div> <div style="text-align: center;">★ 3 Demonstrates the ability to admit to their error, put preventative systems in place, and quickly fix the error.</div> </div>
<p>Integrity Score: 10</p>  <p><i>Description:</i> This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.</p> <p><i>Interpretation:</i> The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.</p> <p>Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.</p>	<p>Describe an ideal person who has high integrity. Detail	Interview Guide
<p>Resilience Score: 79</p> <p><i>Description:</i> This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.</p> <p>Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.</p> <p><i>Interpretation:</i> The candidate's score in this area should contribute to enhanced overall job performance.</p> <p>Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions and the ability to take control of events. Candidate can likely push forward to achieve their goals, even when obstacles come their way.</p>	<p>Describe a time when something at work/school didn't go as planned. How did you feel? How did it impact your work moving forward?</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;"> <p>1</p> <p>Feelings had a negative outlook. Event impacted their work in a negative way, they weren't able to learn from it or persevere.</p> </div> <div style="text-align: center;"> <p>2</p> <p>Feelings are true to the situation. Event impacted their work in a negative way but were able to learn from it and persevere.</p> </div> <div style="text-align: center;"> <p>3</p> <p>Feelings are true to the situation but with a positive outlook. The event impacted their work in a positive way or didn't impact their work at all.</p> </div> </div> <hr style="border: 1px solid black; margin: 20px 0;"/> <p>Tell me about a time you tried to reach an aggressive goal that you failed to achieve. What was the reason you missed the goal?</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;"> <p>1</p> <p>Their answer revolves around outside forces (boss, economy, coworkers, etc.) They do not take responsibility.</p> </div> <div style="text-align: center;"> <p>2</p> <p>Their answer is a mix of what they could have done better and how others could have helped impact their goal.</p> </div> <div style="text-align: center;"> <p>3</p> <p>Their answer revolves around them and what they could have done better to set themselves up and achieve the goal.</p> </div> </div>

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
