Interview Guide

### Adaptability

Score: 79

#### Description:

This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.

#### Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Prefers a dynamic work environment. Able to remain focused and positive in times of significant workplace change. Fairly easy-going and relaxed. However, may appear uninterested under certain circumstances.

Even in a fast-changing environment there can be periods of relative calm and stability. How do you keep from getting bored during these slower times?

1

Candidate has no effective technique to keep them from getting bored.

2

Candidate can explain one effective technique to keep them from getting bored.

3

4

Candidate explains multiple effective techniques to keep them from getting bored. Shows they enjoy stability too.

5

Describe a time where you had to adapt to some significant changes at work. How did you feel? How did you handle the change?

1

Feelings: Strong Dislike or Very Resistant. Weren't able to handle the change or needed significant help.

2

Feelings: Unfazed or Slightly Resistant. Handled the situation & change only impacted their work in a minor way.

3

4

Feelings: Excited or Comfortable. Handled the situation well and in a way that didn't interfere with their work.

5

**Interview Guide**
**Drive**

Score: 91

*Description:*

This scale reflects the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.

*Interpretation:*

The candidate's score in this area should contribute to enhanced overall job performance.

Highly motivated by challenging goals and tasks, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on understanding guidelines, following the rules and personal achievement.

Describe a time when you had some extra time available at work. How did you use this extra time?

1

Did not use their time in a beneficial way, or in a way that added value to the organization.

2

Used their time in a work related way, but those efforts didn't demonstrate hard work or added value (easy).

3

4

Used time in a beneficial way and added value to the organization. Showed ability to work hard and willingness to put in extra effort.

5

How do you respond when the going gets tough and it seems like you and your team are facing a nearly impossible task?

1

They are unenthusiastic. They respond by working to their expectations or less due to being overwhelmed.

2

Their feelings are neutral. They respond by working hard to achieve the goal.

3

4

They are enthusiastic. They respond by working hard to achieve the goal and by using all necessary sources.

Describes a meeting where they have a positive interaction with the prospect and gathers information to move the sale forward.

Detail Interview Guide

**Resilience**

Score: 90

*Description:*

This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.

Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.

*Interpretation:*

The candidate's score in this area should contribute to enhanced overall job performance.

Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions, having control over the events, being proactive, remaining hopeful, and learning from the experience. Candidate can always be expected to push forward to achieve their goals, even when obstacles come their way.

Describe a time when you were trying to achieve a goal, but obstacles and setbacks kept getting in your way. What were you trying to accomplish and how did you respond each time something got in your way?

1

Unable to provide an example OR Example is concrete but they responded negatively and didn't adjust/achieve their goal.

2

Example is concrete, they adjusted their goal regardless of the setback, and responded positively but had a negative outlook at first.

3

4

Example is concrete, they achieved or adjusted their goal regardless of the set-backs, and responded with positivity.

5

Describe a time when something at work/school didn't go as planned. How did you feel? How did it impact your work moving forward?

1

Feelings had a negative outlook. Event impacted their work in a negative way, they weren't able to learn from it or persevere.

2

Feelings are true to the situation. Event impacted their work in a negative way but were able to learn from it and persevere.

3

4

Feelings are true to the situation but with a positive outlook. The event impacted their work in a positive way or didn't impact their work at all.

5

## Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at [www.hravatar.com](http://www.hravatar.com).
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

## Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
