

Test Results and Interview Guide

Candidate:	Elizabeth Wantsajob
Assessment:	Essay Test (Short, General, Spanish)
Completed:	September 26, 2026
Prepared for:	Sara Maple Example Company

What's Included

- Overall Score
- Competency Summary Table
- Comparison Matrix
- Detailed Competency Results with Interview Guide

Important Note: The Essay Test (Short, General, Spanish) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Overall

Competency Summary

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

 Overall Score: 62

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail

Interview Guide

Writing

Score: 62

Description:

The ability to be concise, friendly, and accurate when drafting written communications.

Interpretation:

The candidate exhibits average writing skills, which can hinder high performance in some jobs.

Average writing style. Usually gets point across but may use extra words or inconsistent sentence structure. See writing sample section of report for raw essay(s) submitted.

Overall AI Score: 65.0
 Approximate Word Count: 197
 Average words per minute while composing: 21.7
 AI Confidence Level: 80
 Argument Strength (AI): 60.0
 Clarity and Coherence (AI): 70.0
 Grammar and Mechanics (AI): 60.0
 Other Errors per 100 Words: 2.0
 Spelling errors per 100 words: 1.0

Please see below to view the essay submitted.

Are you comfortable when you need to express yourself through writing? Do you feel confident you can get the right message across? Tell me about a project or task where your writing skills were required for success. How did it go?

1

Not confident in own writing ability. Prefers speaking.

2

Somewhat confident in own writing ability. Writes frequently.

3

4

5

Very confident in ability to write. Has received compliments on clarity of written correspondences.

Writing Samples

During the assessment, the candidate was asked to write one or more passages. The text they wrote is included below for review.

Question or Task	Response
Please write an essay of 100 - 800 words evaluating the advantages and disadvantages of living in a tropical climate.	Living in a warm or tropical environment has a number of advantages and disadvantages. Whether it's right for you depends on your preferences, and in some cases, your health. The advantages include the following: a. You can walk outside in light clothing almost every day and you never have to wear a heavy coat. b. Most plants and trees grow faster in warm climates so if you like to maintain a garden you will experience greater success. c. Nice weather every day means you are not stuck inside for long periods of time, which can sometimes cause depression. At the same time, significant disadvantages include the following: a. It rains on most days and you need to be prepared for heavy rain at all times. b. The hot sun can cause severe sunburn if you are outside and not protected. c. Your air conditioning utility bill can be very high and it can drain financial resources. d. Hot humid weather can make strenuous exercise more difficult if you are not in good health. When deciding if living in a tropical climate is right for you, consider which of these advantages or disadvantages is most meaningful for you. Comments (AI): The essay provides a balanced view of the advantages and disadvantages of living in a tropical climate. The ideas are logically presented and easy to follow, though there are minor spelling and grammar errors. The arguments are somewhat persuasive, but could be strengthened with more detailed examples and explanations. Overall, the essay meets the average scoring criteria. Misspelled Words: coat (1), resourcez (1)

Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

Photo Analysis Results

- Risk:	Medium risk of cheating based on image inconsistencies
- Percent match among processed faces	100%
- Total images processed	17
- Total images with valid faces	14 (82%)
- Total pairs of faces compared	13
- Pairs in which faces matched	13 (100%)

Question

CT3_ESAY_SAMPLE_REPORT_I_1
Please write an essay of 100 - 800 words evaluating the advantages and disadvantages of living in a tropical climate.

Candidate Response Information

Living in a warm or tropical environment has a number of advantages and disadvantages. Whether it's right for you depends on your preferences, and in some cases, your health.

The advantages include the following:

- a. You can walk outside in light clothing almost every day and you never have to wear a heavy coat.
- b. Most plants and trees grow faster in warm climates so if you like to maintain a garden you will experience greater success.
- c. Nice weather every day means you are not stuck inside for long periods of time, which can sometimes cause depression.

At the same time, significant disadvantages include the following:

- a. It rains on most days and you need to be prepared for heavy rain at all times.
- b. The hot sun can cause severe sunburn if you are outside and not protected.
- c. Your air conditioning utility bill can be very high and it can drain financial resources.
- d. Hot humid weather can make strenuous exercise more difficult if you are not in good health.

When deciding if living in a tropical climate is right for you, consider which of these advantages or disadvantages is most meaningful for you. (65.0)

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Writing	62.9784	Z-Statistic	-0.1348	100.0000
Weighted Average of Competency Z-Scores:				-0.1348
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				-0.1348
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				62.9784
